

AN UNPARALLELED INTEGRATED SOLUTION
FOR MANAGING AND PROTECTING YOUR
PEOPLE AND BUSINESS ASSETS, GLOBALLY

A new dimension in security

The new Galaxy Dimension | Integrated intrusion and access

Make security an asset not a burden

Regardless of what type of business you are in, putting in place the right level of protection for your people and your assets is vital! After all, burglary could seriously impact your bottom line...

For your peace of mind, Honeywell offers a security solution that you can trust, which simply and efficiently protects, and becomes an asset, not a burden to your business.

Look to the future with Galaxy Dimension:

- Fifty years industry experience
- Proven Galaxy technology
- First class system support
- A long-term investment
- Flexibility, in line with your business needs
- Compatibility with existing systems

What is the NEW Galaxy Dimension?

Galaxy Dimension delivers a high security solution, seamlessly merging intruder and access control functionality.

Offering maximum round the clock protection for any business no matter how large or complex, it provides superior flexibility and functionality using class leading technology.

A revolutionary new graphical touch-screen control centre simplifies operation and helps reduce operator error. Remote servicing options mean that your system consistently operates at its optimum level, and can even alert an engineer to issues between service intervals.

Galaxy Dimension offers peace of mind in a simple, secure and reliable system, making it a winning solution for your business.

How will Galaxy Dimension's integrated system benefit your business?

Maximum convenience, maximum security

Combining access and intrusion into one integrated system means a single point of contact, simplifying operation and flexibility. Changes and extensions to the system are quick and easy, you will rapidly feel the benefit of more time on your hands... Our secure remote management tool lets the system look after itself! Self monitoring and communicating directly with the engineer, means site visits become few and far between.

Simplicity of operation

Free up your time using our simplest ever user interface. System administration becomes quick and easy using our innovative TouchCenter keypad. You can easily view full system status at a glance via the TouchCenter's large, colour touch-screen with crystal clear graphics.

Grows with your business

The Galaxy Dimension range is fully flexible providing you with the best fit and specific functionality for your security needs. Upgrading needn't cost the earth. In a straightforward swap, Galaxy Dimension can replace your legacy system with ease.

Time is not lost through lengthy system training. The system's simplicity means you are up and running within minutes.

Using simple swipe or touch-n-go readers, personnel gain access to assigned parts of the building. Using the same readers, those who control security can also arm and disarm the intruder alarm functions, giving maximum flexibility with no added complications!

Securing your people and your premises

Galaxy technology is already the preferred system choice across many sectors which require large security systems. Installed in retail, financial, local authority and industrial premises, our technology offers the functionality and flexibility to meet a diverse range of needs.

The new Galaxy Dimension takes security to a higher level, achieving true integration by bringing together intrusion protection and access control, ensuring your business benefits:

Retail

- Remote management of multiple sites from a central location
- Ensuring secure areas are protected at all times while allowing easy access for authorised personnel

Industrial

- Large-scale security, customisable to allow specific areas of the site to be operated independently of each other
- Centralised system management and reporting

Local Authority

- Conveniently controlling free movement of employees and clients across authorised access boundaries
- Simplified staff management by using existing personnel proximity cards for access and system control

Corporate & Financial

- Protection of vaults and ATMs is easily catered for through dedicated input and control features
- Highest security levels are maintained through system automation and customised scheduling

Efficiently managing your people and places

Using a single intuitive interface, you can easily control access levels for different groups of personnel through templates and schedules which you can programme to activate automatically.

A system with no limits

Galaxy Dimension is able to seamlessly merge with other systems such as CCTV and environmental control, so that it becomes an integral part of your building management solution.

Reliability: total peace of mind

The integrated system design simplifies user operation, while maximising overall security. This, combined with an intelligent "listen-in" function, significantly reduces false alarms, giving you total confidence in your system.

Honeywell empowers you to make the best security decisions for your business

With expertise in every area of security, we provide discreet, hi-technology, integrated security solutions. We are one of the world's leading manufacturers of security systems and understand your need to keep your people, premises, assets and intellectual property safe and secure.

Galaxy Dimension Key Features

- ✓ **Integrated Intrusion and Access Control**
 - Up to 32* independent protected areas
 - Up to 520* detection zones
 - Up to 64 doors
 - Up to 1000 card holders per system
 - Up to 67* Weekly schedules
- ✓ **Supports up to 32* keypads**
- ✓ **Support for graphical touch-screen keypad (up to 4*)**
- ✓ **Event logs for Access and Intrusion (up to 1000 and 1500 events respectively)**
- ✓ **Supports several communications options (PSTN, ISDN, Ethernet)**
- ✓ **Up to 32* Audio Verification (listen-in) channels**
- ✓ **Single PC based central management solution**
- ✓ **Enhanced interfacing protocol for system integration**
- ✓ **Compliant to all relevant European standards**
- ✓ **Fully compatible with existing Galaxy range**
